

Forwarding this open letter from the CashTrans CEO...

Dear Client,

I am writing you to offer our **special assistance** during a very important time in the financial industry!

All financial institutions are facing several big events in 2018 and 2019 such as **equipment vendor evaluations and possible changes along with 2018/2019 planning and budgeting for Windows 10!**

It is imperative to meet the January 2020 deadline for three major reasons:

First, by missing the Windows 10 software deadline you will be subject to discontinued support for Windows 7 creating potential security risks and issues!

Second, if you do not order upgrades or new equipment in 2018 or early 2019 you run the risk of untimely manufacturer delivery and installation delays.

Third, by upgrading your ATM fleet you reap all the benefits outlined in this NCR Windows 10 whitepaper.

[Click here to download a copy of the NCR Windows 10 whitepaper...](#)

Furthermore, many models of ATM equipment are **obsolete and cannot be upgraded** to Windows 10 such as NCR Persona models, Diebold 500 and 560 cash dispensers along with Nautilus series 7000 and Tranax MBS 5000. Unless you are buying new Windows 10 enabled equipment all other ATMs will most likely need new core and software upgrades. **Do not delay in placing upgrades and new orders to avert missing critical deadlines!**

CashTrans is here to help! Allow us to survey your ATM fleet!

It is critical to evaluate and properly plan upgrades and migration projects as far in advance as possible. Due to the estimated scope of replacements across the country, production delays and back order conditions are expected as we near the deadline. Couple this with the network project queues and blackout periods, installations may be delayed and put you at risk. **Proper planning will ensure the ability to institute the projects and stay in compliance.**

The **first step** in success is a complete evaluation of your existing ATM equipment upgrade/replacement options will vary greatly by manufacturer, model, and internal

components. **Only with a complete knowledge of your existing equipment, components, and software status can a thorough evaluation be met, and a cohesive progression be determined.**

Secondly, please join us on Thursday, August 23rd for an Open House at NCR's Global Headquarters! Windows 10 and other key industry topics will be discussed in detail! Plus, we will have a tour and reception afterwards at the College Football Hall of Fame.

[Just click here for more information to register today...do not delay!](#)

We stand ready to support your every need as we continue to offer a broad array of exceptional ATM equipment options, ATM turn-key outsourcing and managed services solutions, ATM driving/processing, physical and electronic security equipment, new branch consulting and more. In addition, our dedication to superior service will never change as that is the hallmark of our brand. **Your success is our success!**

Most sincerely,

Ronney

Ronney Henderson
CEO CashTrans

Please contact me by phone or email if I may be of any support during this critical planning and budgeting period!

Kind regards,
