

## EMV Cleaning Kits and Overview

Financial institutions across the country have upgraded their ATM fleets with new EMV Chip Card Readers, some are motorized but the far majority are with dip readers.

**To ensure the best consumer experience and to avoid costly mis-reads, you will need to clean the EMV readers once and in some cases twice a month.**

A dirty EMV Card reader will cause misreading and malfunction. Avoid service calls and customer issues with a regularly scheduled program of card reader cleaning which takes less than 1 minute!!!

**CashTrans** has selected the Universal DISKO Dip card cleaning kit #1534S (Special) with 2 chip cleaning cards and 3 advanced microfiber cleaning cards for the mag reader.

**Note:** This cleaning kit will work with all manufacturer makes and models.

This cleaning kit is far superior to any other on the market and at a cost as low as only \$1.50 per cleaning.

Do not be fooled by the 20 year old wet cleaning options which are more expensive and far inferior. Wet solution products smear the dirt while the advance microfiber absorbs it. See actual proof below:

WET Cleaned Chip

DISKO Cleaned Chip

## Cleaning Kits for Cash Recyclers

In addition to advanced ATMs and the need to clean on a regular basis, CashTrans also provides a DISKO Cleaning Kit for Cash Recyclers for all makes and models #1920S (Special).

Currency is considered one of the dirtiest surfaces that deposit dirt and grime on the belts and reading heads of cash recyclers.

To ensure maximum uptime and to avoid costly mis-reads, you will need to clean your cash recyclers once a month utilizing the advanced Universal DISKO Cleaning Kit from CashTrans.

A dirty scanner and belts can cause misreading and malfunction. Avoid service calls and customer issues with a regularly scheduled program of recycler cleaning, which takes less than 2 minutes!!!

**CashTrans** has selected the Universal DISKO Cash Recycler Cleaning Kit #1920S (Special) which contains 25 Cleaning pads that are inserted as currency and cycle throughout the recycler cleaning belts, rollers and scanning surfaces. The cleaning card is deposited into the reject bin upon completion.

We recommend cleaning each recycler weekly and at a minimum bi-monthly to help it maintain high performance and accuracy.

**Note:** This Cleaning Kit works on all manufacturer makes and models.

“An ounce of prevention is worth a pound of cure” according to Benjamin Franklin. Wise advice, so cleaning weekly at a cost as low as \$3.40 per cleaning is remarkable and worth every penny.

## Cleaning Kits for Bulk Note Acceptors

**CashTrans** has selected the Universal DISKO Bulk Note Acceptor Cleaning Kit #1930S (Special) which contains 25 Cleaning pads that are inserted as currency and cycle throughout the acceptor cleaning belts, rollers and scanning surfaces. The cleaning card is deposited into the reject bin upon completion.

We recommend cleaning each recycler weekly and at a minimum bi-monthly to help it maintain high performance and accuracy.

**Note:** This Cleaning Kit works on all manufacturer makes and models.
